---

Formal approval has not been given yet, however I do anticipate the field work to start in late Oct.

Here's the status:

CSM: ADEQ and EPA ok, will be approved with risk comments that can be resolved after sampling.

GW dye tracing test: ADEQ and EPA ok (for now), will be approved with comments.

SAP and QAPP: ADEQ and EPA ok except for QAPP comments. McKesson is submitting revised QAPP and once received, the whole CSM/GW dye tracing/SAP/QAPP package will be approved.

John, can you tell me if EPA R6 has given McKesson approval to start work according to this plan? If so, do you know when work will begin and when it will be completed?

Thank you.

Curt
